

WebUI REST API error - AC-3293

Issue/Symptoms:

When accessing QAD through WebUI rest API, error message, "the Invalid handle. Not initialized or points to a deleted object. (3135)" appears

Facts/Environment:

AUX

WebUI REST API

Production Orders

Root Cause:

Performance

Resolution/Fix:

This will be fixed by FRQ-1339 on QRA March 2022.

Workaround is to increase timeout as follows,

1. added the following to configuration.properties,

qra.api.default.calltimeout=1200 qra.api.ibrowseservice2.getallbrowserresults.calltimeout=1200

2. yab configure-qracore-environment-update -v
